- 1. Call To Order**
- 2. FOIA Compliance** – Public notification of this meeting has been published, posted, and mailed in compliance with the Freedom of Information Act and the Town of Hilton Head Island requirements.
- 3. Open Session**
 - a. Land Acquisition Background
 - b. Land Acquisition Manual
 - c. Land Acquisition Program and Economic Development
 - d. Funding Review
 - e. Public Comment
- 4. Executive Session**
 - a. Review of Specific Parcels
- 5. Adjournment**

TO: Town Council

FROM: Stephen G. Riley, Town Manager

DATE: February 11, 2013

RE: **Land Acquisition Workshop February 18, 2013**

We will be meeting for an in-depth review of land acquisition matters on Monday, February 18. In open session we will review some background on our program, our current funding status, the Town's land acquisition manual and future direction of the program. Following that we will need an Executive Session to discuss several specific parcels.

Program Background

For your preparation for this workshop I have included Chart "A", which is a master listing of all the properties the Town has either acquired outright or from which we have acquired some development rights. Each property has a designated map number that corresponds to the property numbers on the enclosed map. Chart "A" identifies the purchase price of each property and the potential use of the property as stated by the Council at the time of purchase. One additional very important item on this chart is the source of funding. The source of funding could limit how the property may be used.

Land Acquisition Manual

Each of you has been provided a copy of the Land Acquisition Manual. This manual was adopted by the Town Council in 2002 to guide our land acquisition program. While we can review the acquisition procedures identified in this manual, we should focus our discussion on two items: 1) the use of appraisals in our process and 2) the criteria to guide the purchase of property. A March 16, 1999 resolution adopted by Town Council to identify criteria to guide land acquisition is contained in Exhibit A of the manual. These criteria are:

1. Address traffic congestion concerns by reducing development potential in strategic locations;
2. Preserve open space, and thus the aesthetic quality of our community along major roads;
3. Acquire land that provides public access, and/or views to the water;
4. Acquire land which furthers one of the above criteria while also furthering the Town's Comprehensive Plan; and
5. Place restrictive covenants on property or portions of property and resell where appropriate, to facilitate acquisition of other parcels that further the above objectives.

Other guidance on land acquisition in the past has been offered by the language obtained in past referendums on bonding for land acquisition. The language from the 2008 referendum states bond proceeds would be used to purchase developed and undeveloped land, development rights and conservation easements in order to manage growth and development, mitigate traffic congestion, protect water quality and other aspects of the environment, establish active and passive parks, construct public facilities, and preserve historic sites.

Economic Development

One important topic to include in this discussion is the resale of land to spur redevelopment or economic development. Should the land we already have be used as a tool in this endeavor? Also how would we use this land – make specific parcels available to attract desired new developments to the Town or as an incentive to encourage the redevelopment of adjoining developed sites, sell land at a reduced price, sell only the density we have acquired, allow the soon to be created economic development corporation to use some land as a resource to accomplish its goals, etc.?

Should we look for other funding sources and buy other land? There was negative public reaction when we discussed using the proceeds from the last bond referendum for economic development purposes in the past. With remaining funding being limited, it may be time to consider new bonding for future land purchases. Proceeds from new bonding may provide more flexibility to expand the scope of the land acquisition program to include efforts aimed at redevelopment and economic development.

Another concept that has surfaced more recently would have the Town purchase vacant or underperforming commercial properties to remove them from the market. The purpose of this concept is to reduce the amount of older commercial space as some suspect we have more commercial square footage than our community can support now or in the future. Once acquired, the Town could demolish the structures to create more green space or perhaps market the properties for more desirable uses.

Available Funding – February 2013

<u>Source of Funding</u>	<u>Amount Available</u>
2010A Referendum General Obligation Bond	\$ 1,682,000
Resale of Land Account	2,368,000
Total	<u>\$ 4,050,000</u>

This amount takes into consideration offers outstanding and contracts not closed.

In 2008, the voters approved borrowing up to \$17 million for land acquisition purposes. Purchases since 2010 and new purchases under consideration limit the balance of this total funding source to \$1,682,000.

The annual debt service on current debt has decreased and will decrease further as some bond issues reach final maturity. Prior to the recession and real estate decline, the Town used some real estate transfer fee (RETF) revenues in the land acquisition program. Presently, those RETF funds are used entirely to fund outstanding debt on prior land acquisitions. Current ad valorem revenues provide full funding for outstanding debt of General Obligation Bonds, Referendum General Obligation Bonds and the Public Service Corporation's Certificates of Participation.

The Resale of Land account represents funds on hand from sale of Town-owned land (in full or partial interests to the County); these funds are available to acquire new properties under the land acquisition program.

The Town has the capacity to fund land needed for specific CIP projects with specified revenues (Stormwater Utility Fees/Bonds, Traffic Impact Fees, Hospitality Taxes/Bonds, Beach Fees, Tax Increment Financing (TIF), etc.).
