V ZONE DESIGN CERTIFICATION

I, _____, am a duly qualified engineer/architect licensed to practice in the State of South Carolina.

I have developed/reviewed the structural design, specifications and plans for construction at _____ for _____
(Location) (Project Name)

I certify that:

1. The structure is elevated on pilings or columns so that the bottom of the lowest horizontal structural member of the lowest floor is elevated to or above the base flood elevation of _____ feet above mean sea level.
2. The pile or column foundation and structure attached thereto is anchored to resist flotation, collapse and lateral movement due to the effects of wind and water loads acting simultaneously on all building components. Wind and water loading values shall each have a one percent chance of being equaled or exceeded in any given year (100 year mean recurrence interval).
